

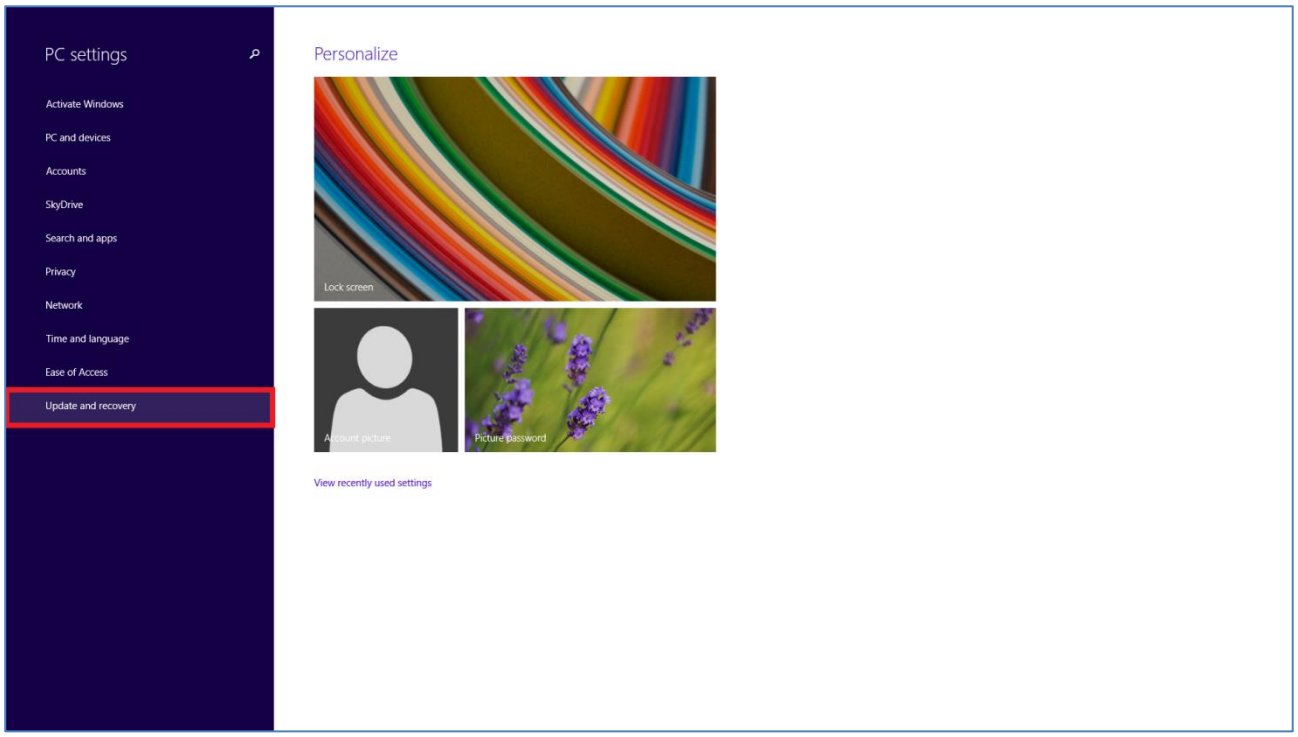
How to recover the system on Windows8.1?

Prepared by MSI NB FAE Team | Version: 1.0 | Date: 2013/11/04

1. Open the Charms:
   1.1 Move your mouse pointerall the way into the upper-right or lower-right corner.
   1.2 When the Charms appear, move up or down the edge to click “Setting”.

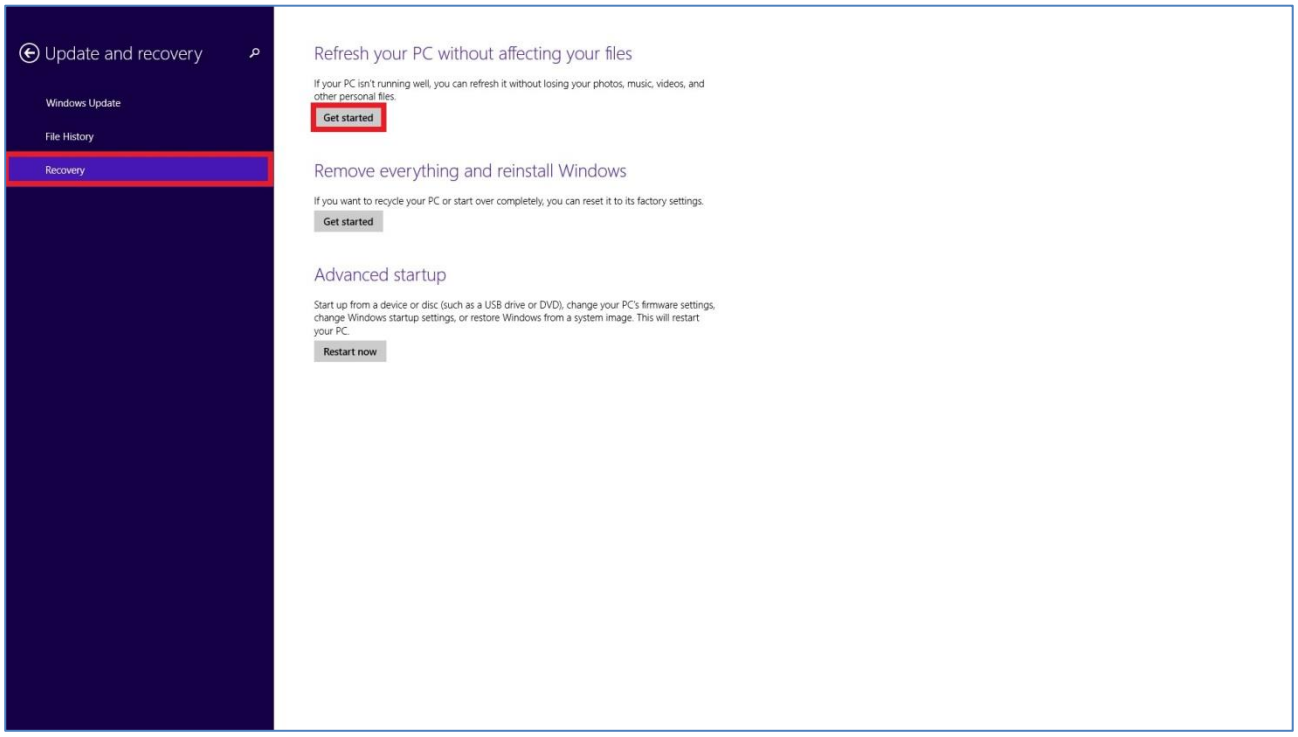
2. Then, Click “Change PC setting”.

3. Click “Update and recovery” on PC settings.



4. Click “Recovery” on Update and recovery.

   4.1 If you would like to keep the personal files, such as photos, movies, and so on, please Press the button of “Get started” under “Refresh your PC without affecting your files”.



4.2 If you would like to remove anything like recover to the factory system, please Press button of “Get started” under “Remove everything and reinstall Windows”.
