Brief Introduction of five charms

1. **Search**

The Search charm utilizes Bing Smart Search so you can search your PC, the web, and OneDrive as well as some apps and the Windows Store. You can search once to get results from everywhere, and you can go back to your search results without searching it again.

2. **Share**

The Share charm is a quick and an easy way to share files, photos, and info with people, or save things for later, without leaving the app you're in. You can share things from most apps with the Share charm. If you want to share things from the desktop, you can share through email or use OneDrive to share files and photos.

3. **Start**

Hit Start charm will lead you to the Start screen no matter where you are in Windows. Or if you're already on Start screen, use it to go back to the last app you were using.

4. **Devices**

The Devices charm is an easy way to send files and info to other devices that are connected to your PC. The list of devices available in the Devices charm depends on the devices you have and whether they're connected to your PC.

5. **Settings**

If you need to make quick adjustments to a few common settings (like brightness and volume), find settings for your PC (like personalization, user accounts, and devices), or change settings for the app you're using, the Setting charm can help you to do it quickly.
