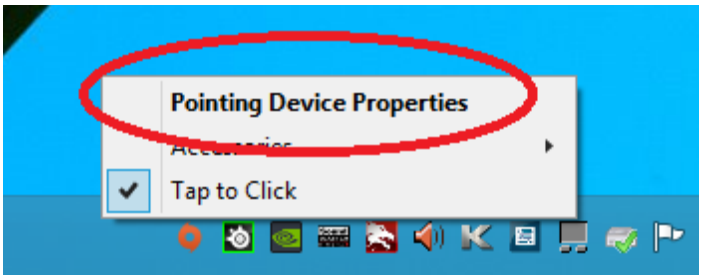
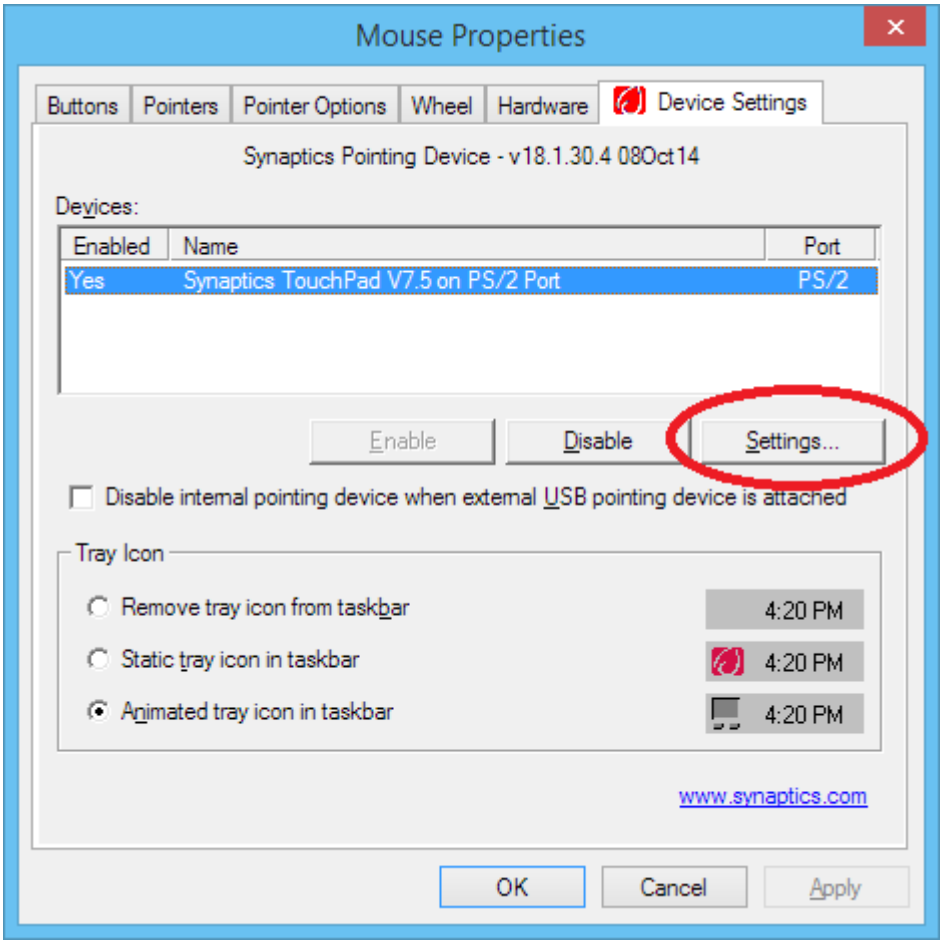
How to use and set up gestures of Synaptics touch pad?

Please follow these steps to find the demostration videos:

1. Right-click the icon of the touch pad in System Tray and select “Pointing Device Properties” to open the window “Mouse Properties”.

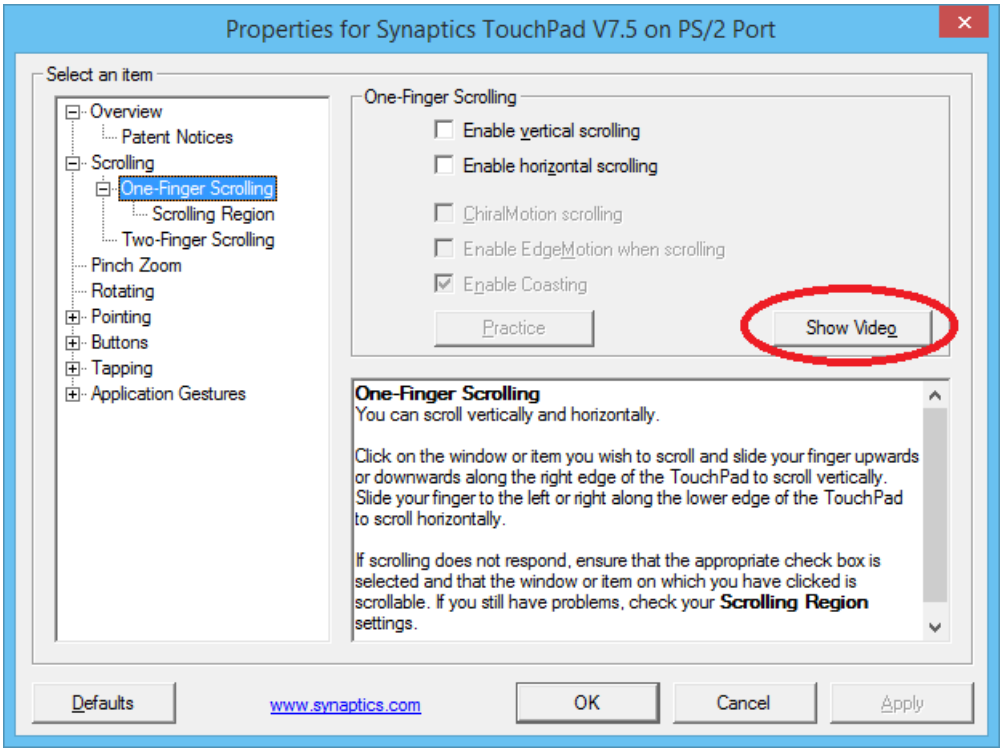


2. Select the “Device Settings” page and then select “Settings…”.

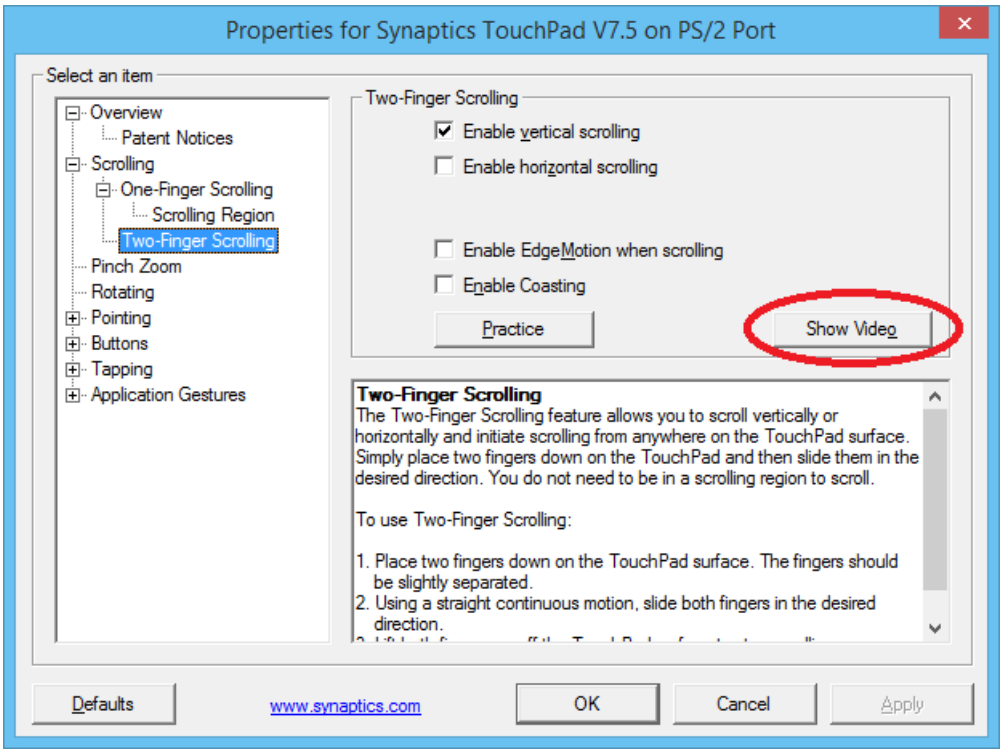


3. In the “Properties for Synaptics TouchPad V7.5 on PS/2 Port” window (the version may vary according to the driver you installed), there are several items listed in the left window.

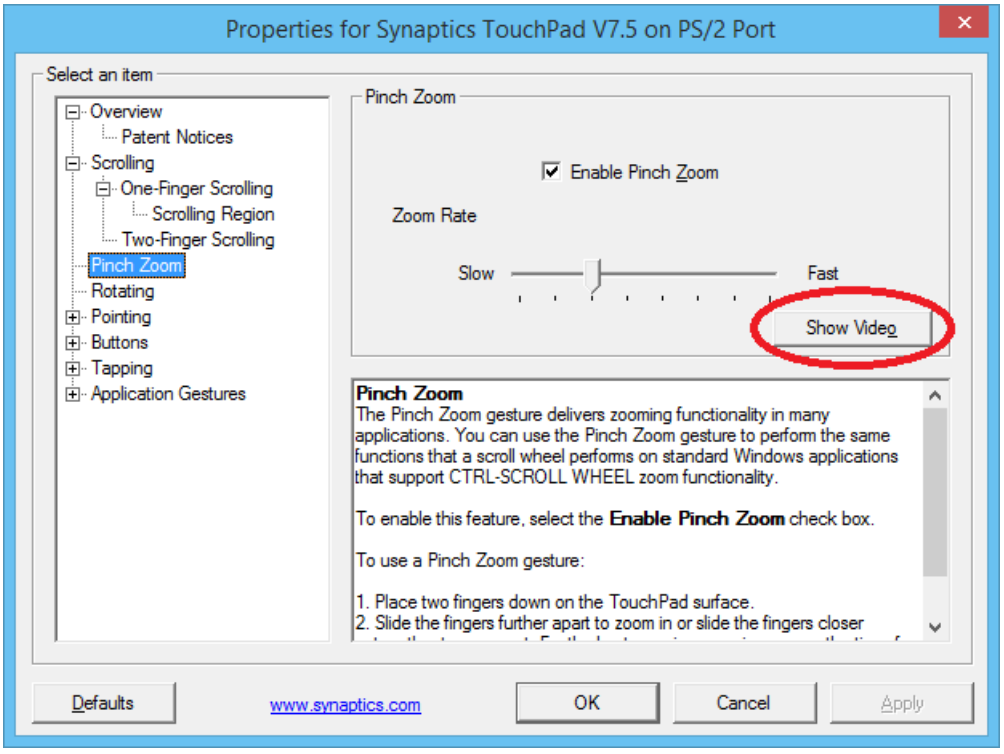
4. Click any plus button to expand the branch of the item and then click the sub-items to show the settings in the right part of the window. Some sub-items provide “Show Video” buttons for you to see the demo videos for corresponding gestures, such as: One-Finger Scrolling



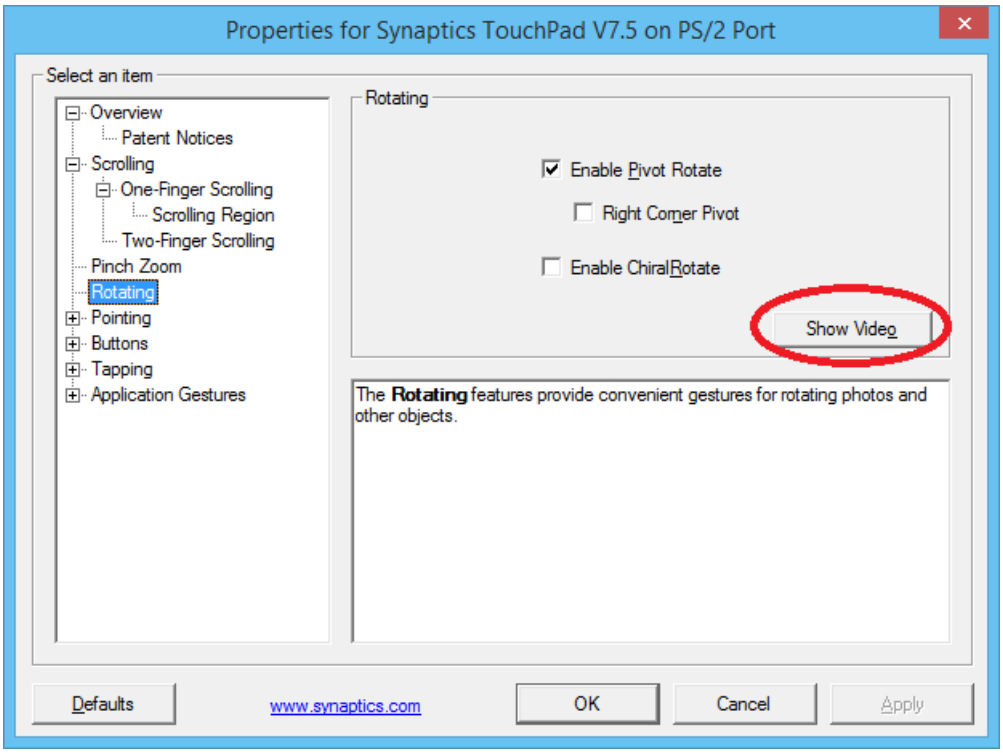
Two-Finger Scrolling



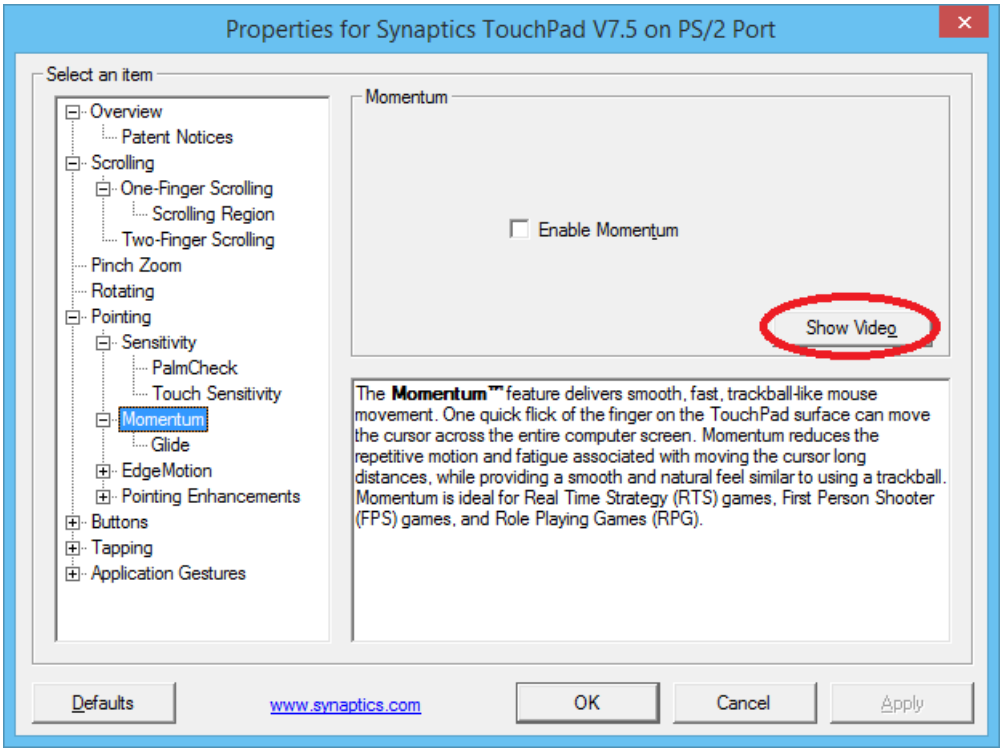
Pinch Zoom



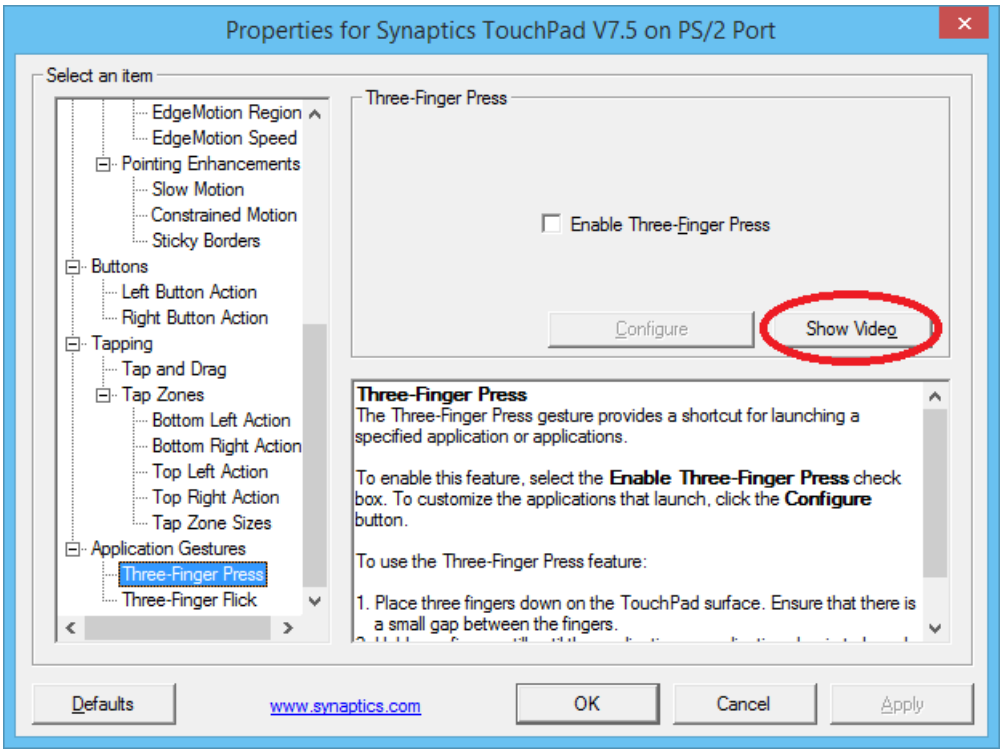
Rotating



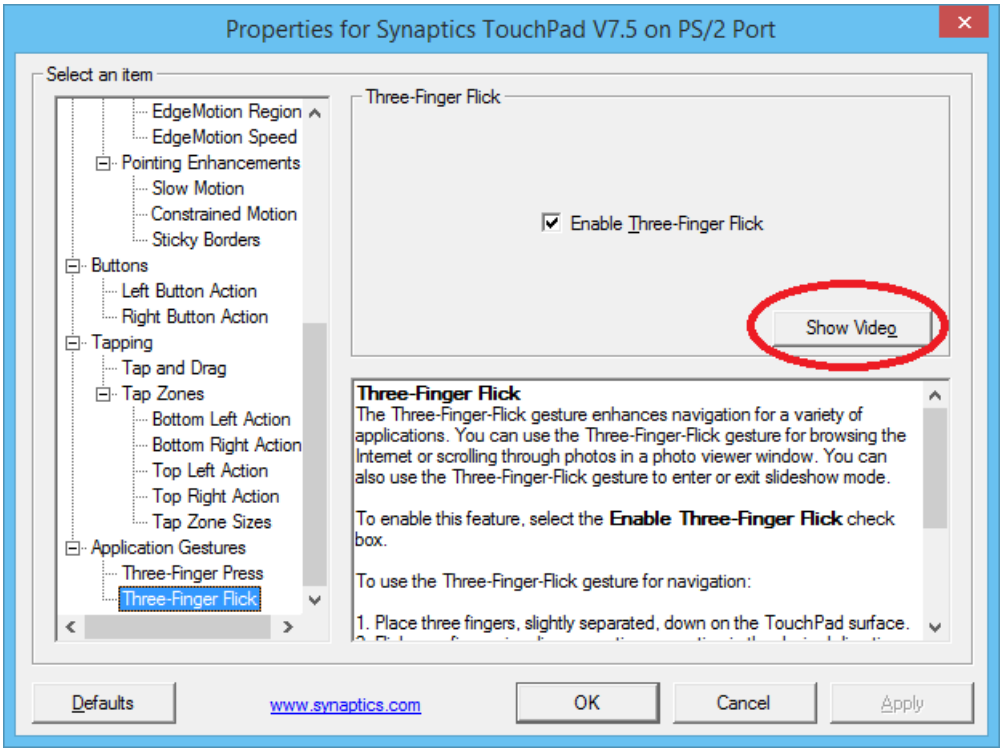
Momentum



Three-Finger Press



Three-Finger Flick



5. Click them to open another video window for corresponding property. Then you can know how to properly set up your Synaptics touch pad. Press the stop button to close the window of this video.
