Change graphics power plan of Intel® graphic processor

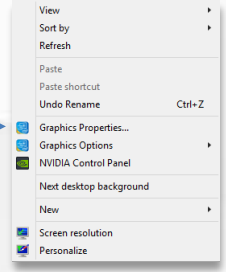
MSI NB FAE

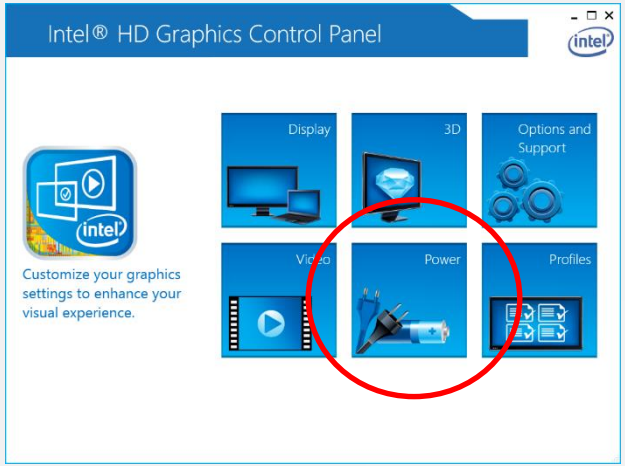
Last modified: 2015-03-19

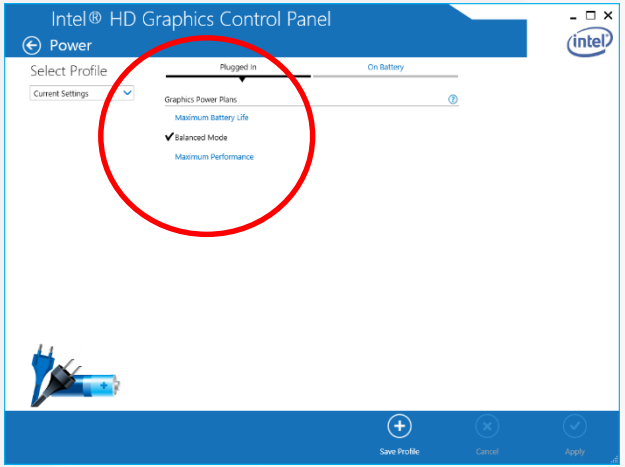
Instructions

Change graphics power plan of Intel® graphic processor

- Right-click on **Desktop** and select Intel®'s **Graphic Properties….**
- Select **Power** icon.
- Change **Graphics Power Plan** to **Balanced Mode** or **Maximum Performance**.
- This change may slightly reduce ability of power saving by notebook.







Thanks for your support to MSI notebooks
