**FAQ No. 01641**

## How to setup different input method for each application window in Windows 8.1?

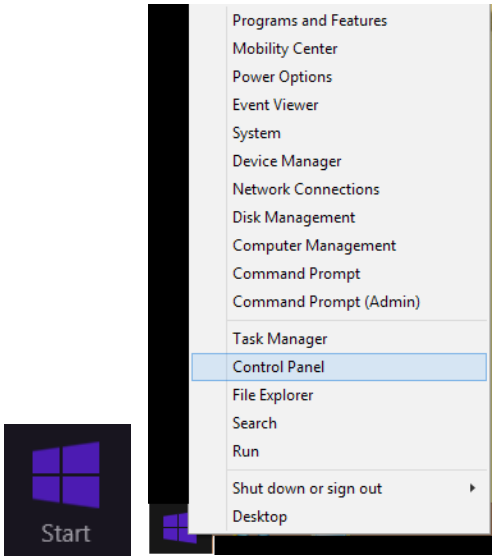
Affected Model: All models with WIN8.1 OS

**Q:** How to setup different input method for each application window in Windows 8.1?

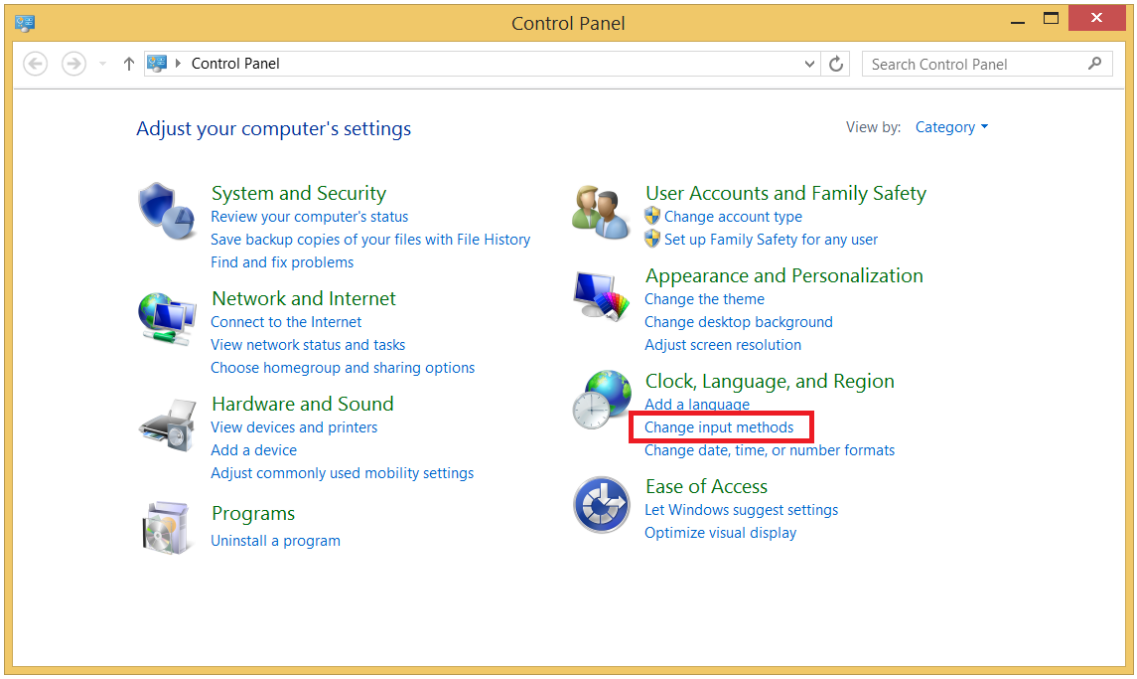
In Windows 7, I can set English input method for Word, and set other language input method for Excel, but in Windows 8, each application is accosiated with the same input method, how do I change it?

**A:** Please follow these steps to setup OS.

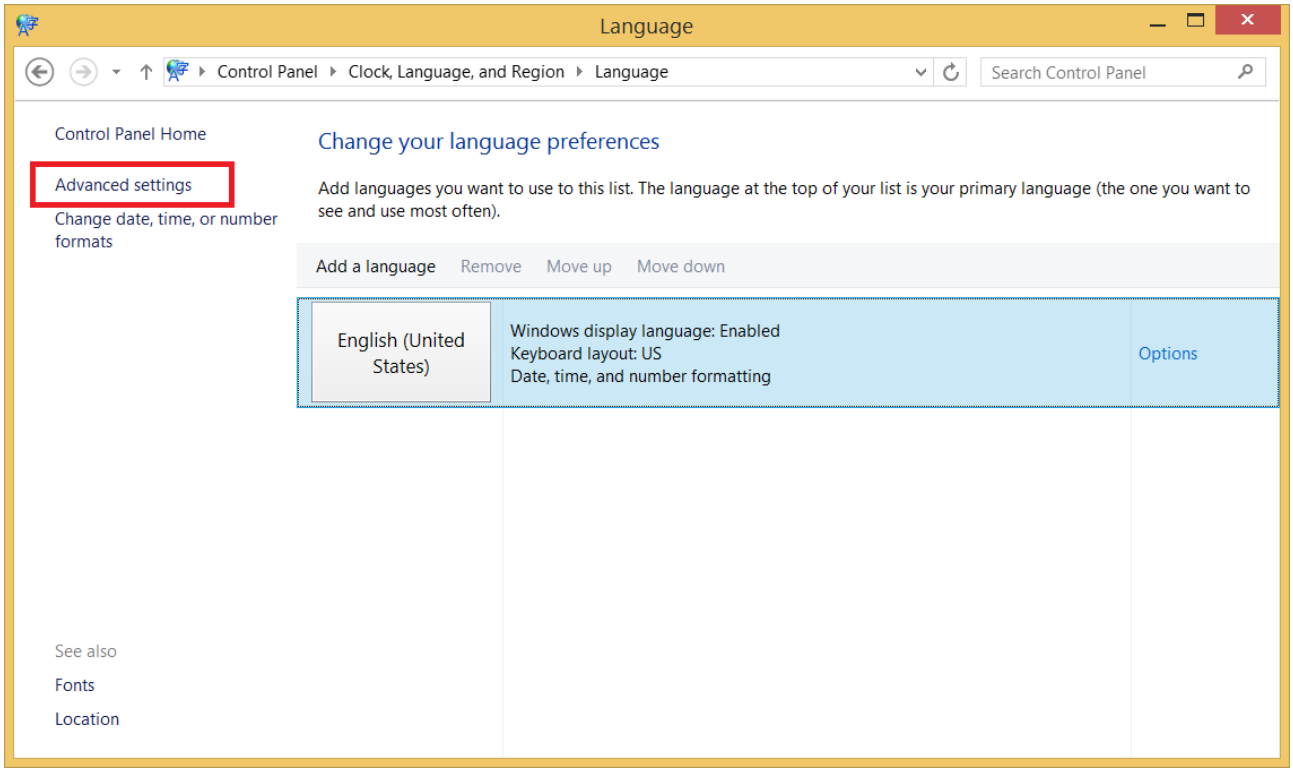
1. Drag the mouse cursor to the left corner of the screen and [Start] icon will show up. Right click the icon to show selection menu. Select [Control Panel] in the menu.



2. Click “Change input methods”



3. Click “Advanced settings”



4. Enable the “Let me set a different input method for each app window” item and save.
