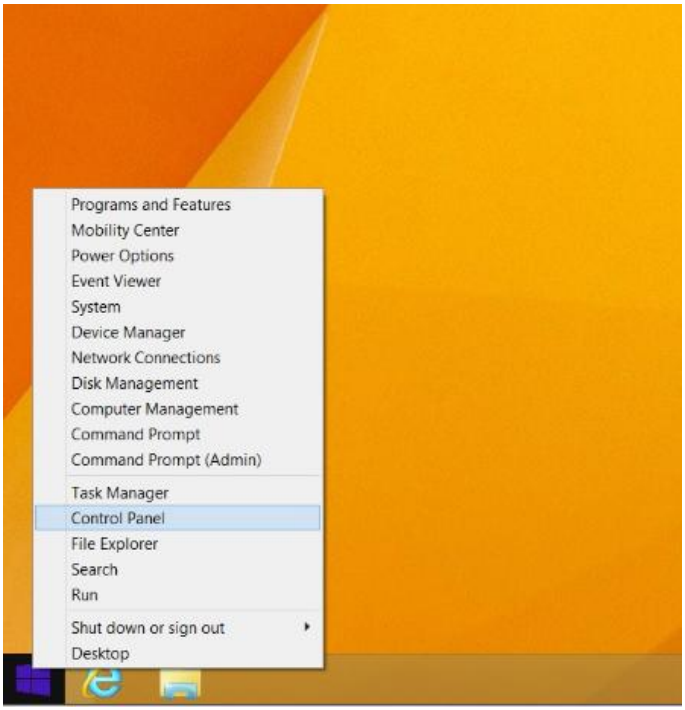
How to show hibernate option in power menu in Windows 8.1

Edited by MSI NB FAE Team | Version: 1.0 | Date: 2015/04/02

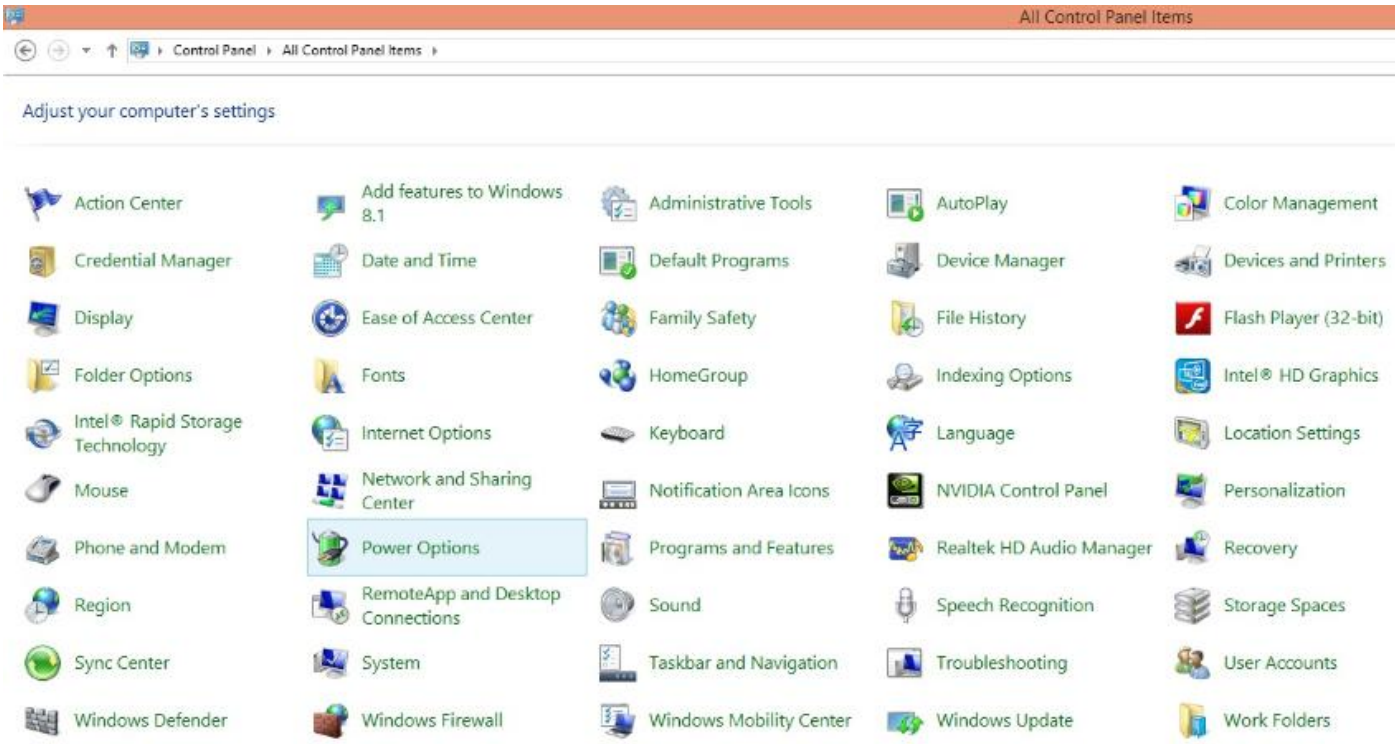
Q:How to show hibernate option in power menu in Windows 8.1?

A:Please do it as below way.

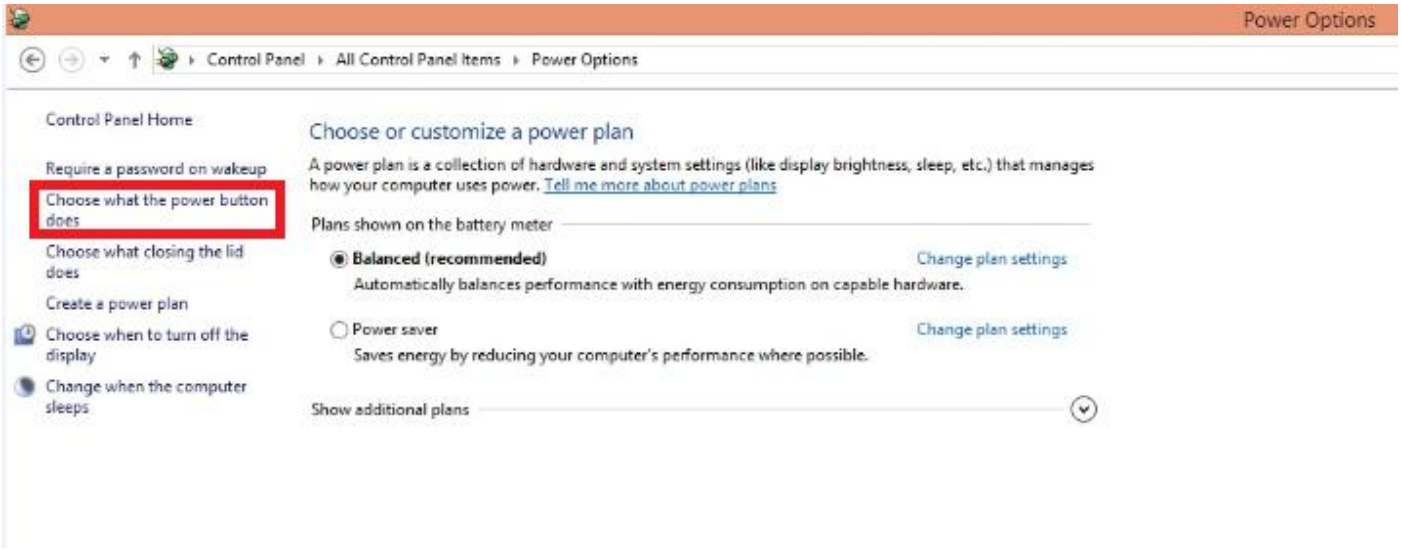
1. For Windows 8.1, right click on Start logo on the left corner, click control panel.



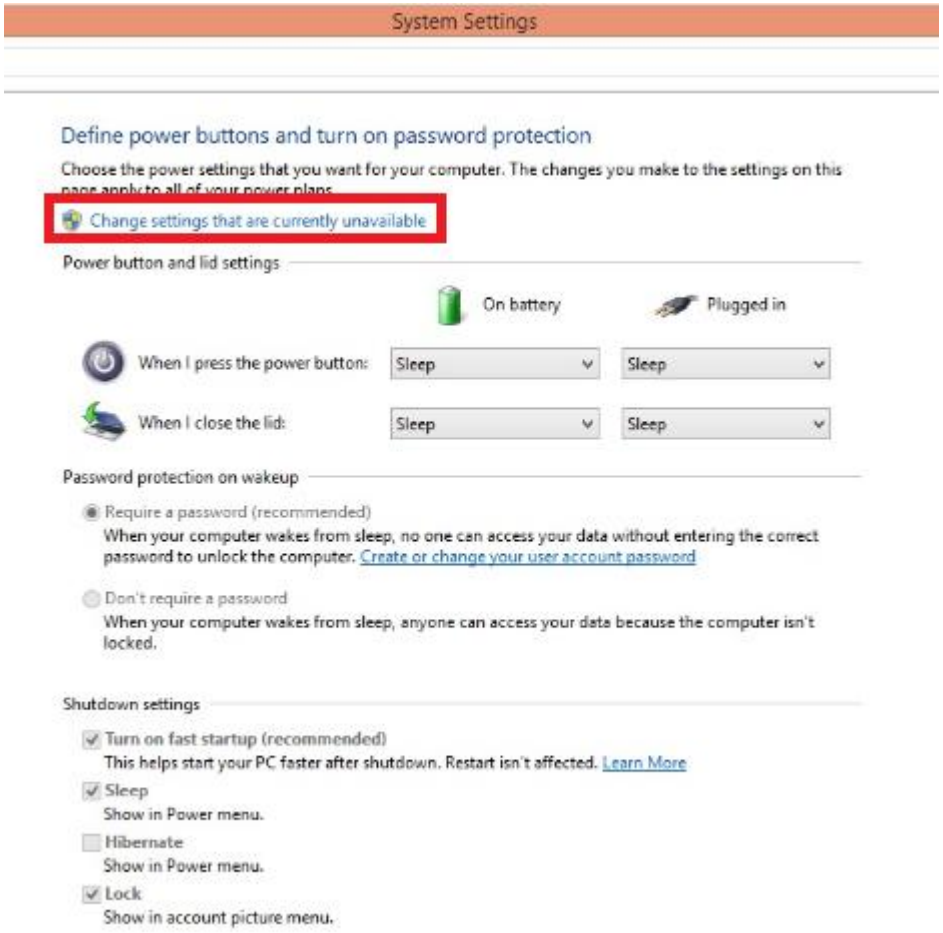
2. Click “Power Option”.



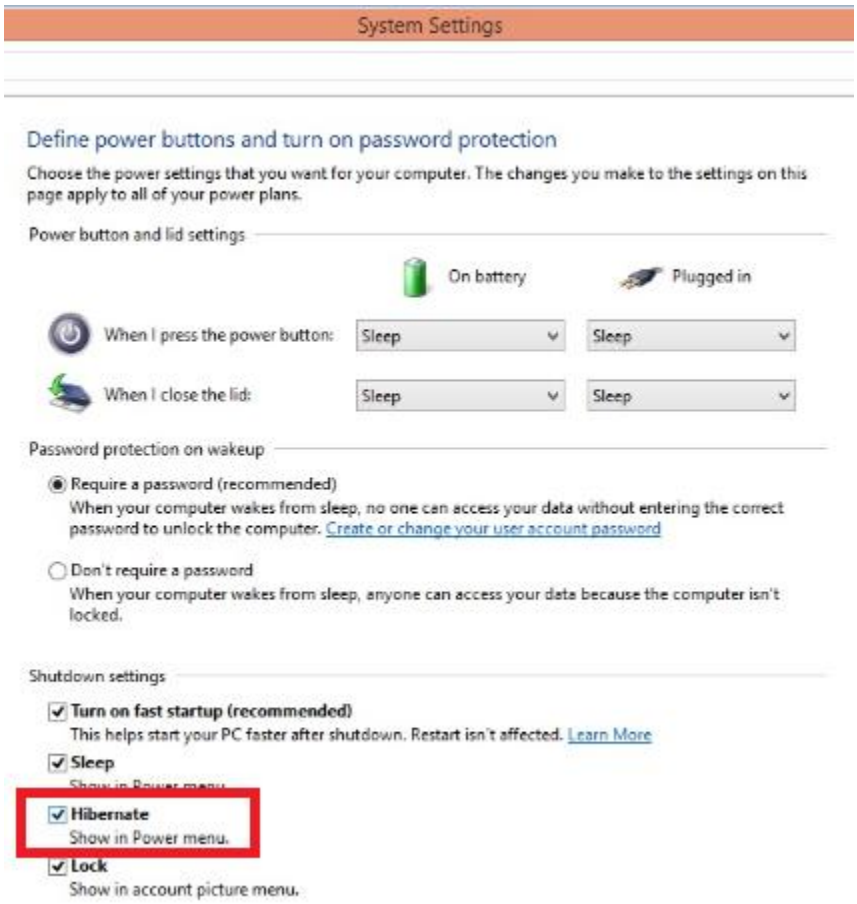
3.Click “Choose what the power button does”.



4.Click “Change settings that are currently unavailable”.



5. Enable “Hiberbate” and click “Save changes” to save setting.



6.Go to power menu, you will find “Hibernate”.
