## FEATURES

### RGB Lighting Effects

Experience over 16 million vibrant colors that dynamically sync with your games, movies, or music, creating an immersive atmosphere that transforms your entire setup.

### Real-time Light Sync

Watch as the lighting instantly responds to on-screen content, pulling you deeper into vast battlefields, dark dungeons, or neon-lit cyberpunk cities. This seamless synchronization enhances both your gaming and viewing experience.

### Music Reactive Mode

Turn your room into an interactive concert hall or battlefield with lights that pulse and flow with your music and sound effects. Perfect for music enthusiasts and gamers alike, this mode automatically adjusts to audio volume for a synchronized light show

### Ambient Scenes

Switch between built-in lighting presets to instantly create the perfect mood - from romantic dinners to relaxing evenings or energetic party atmospheres.

### Modular Installation

Features an innovative segmented light strip design with residue-free adhesive backing, making it easy to install on monitors of various shapes and sizes.

### Adjustable Light Angle

Thanks to the adjustable support base design, you can fine-tune the lighting direction to perfectly suit your setup without the hassle of reinstallation.

### USB Plug-and-Play

Skip complicated network setup - simply plug into your computer's USB port and use our dedicated software to start customizing your experience right away.
