FEATURES

SUPERIOR HYBRID COOLING

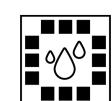

SUPRIM LIQUID's innovative Hybrid design uses both air cooling with STORMFORCE Fan and liquid cooling to effectively manage heat from the GPU and VRAM.

Advanced Performance Pump

A premium design for optimal flow, delivering automotive-grade coolant to ensure the SUPRIM LIQUID stays cool and performs efficiently.

Patented Water Block Design

The patented water block features a special waterway layout and CNC-machined copper base that cools the GPU and VRAM, helping to lower temperatures.

360 mm Aluminum Radiator

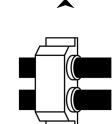

The 360 mm aluminum radiator ensures efficient cooling, while the STORMFORCE fans enhance airflow and simplifies cable management for a tidy installation.

Seven fan blades, claw texturing, and a circular arc are designed for optimal airflow with minimal noise.

A copper base with fine micro-fins immersed in the liquid stream effectively transfers heat away from the VRAM and GPU.

Braided PVC tubes resist permeation and stay flexible, while the scratch-proof cover enhances durability during SUPRIM LIQUID installation.

A reinforcing metal backplate with airflow vents and thermal pads enhances cooling.

The exclusive MSI Center software lets you monitor, tweak and optimize MSI products in real-time.
