

## SPECIFICATIONS

|                            |                                                                                                                         |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Marketing Name             | GeForce RTX™ 5080 16G SUPRIM SOC                                                                                        |
| Model Name                 | G5080-16SPS                                                                                                             |
| Graphics Processing Unit   | NVIDIA® GeForce RTX™ 5080                                                                                               |
| Interface                  | PCI Express® Gen 5 x16                                                                                                  |
| Cores                      | 10752 Units                                                                                                             |
| Core Clocks                | Extreme Performance: 2760 MHz (MSI Center) Boost: 2745 MHz                                                              |
| Memory Speed               | 30 Gbps                                                                                                                 |
| Memory                     | 16GB GDDR7                                                                                                              |
| Memory Bus                 | 256-bit                                                                                                                 |
| Recommended PSU            | 850 W                                                                                                                   |
| Card Dimension (mm)        | 359 x 150 x 76 mm                                                                                                       |
| Weight (Card / Package)    | 2614 g / 3551 g                                                                                                         |
| Maximum Displays           | 4                                                                                                                       |
| G-SYNC® technology         | Y                                                                                                                       |
| Power consumption (W)      | 360 W                                                                                                                   |
| Digital Maximum Resolution | 7680 x 4320                                                                                                             |
| Output                     | DisplayPort x 3 (v2.1b)<br>HDMI™ x 1 (As specified in HDMI™ 2.1b: up to 4K 480Hz or 8K 120Hz with DSC, Gaming VRR, HDR) |
| HDCP Support               | Y                                                                                                                       |
| Power Connectors           | 16-pin x 1                                                                                                              |
| OpenGL Version Support     | 4.6                                                                                                                     |

## CONNECTIONS

1. DisplayPort
2. HDMI™

## FEATURES

### HYPER FROZR THERMAL DESIGN

An apex evolution of advanced thermal design that delivers unparalleled cooling and quiet operation.

### STORMFORCE FAN

Seven fan blades, claw texturing, and a circular arc are designed for optimal airflow with minimal noise.

### Advanced Vapor Chamber

Built-in Vapor Chamber swiftly transfers heat from the GPU and VRAM to the core pipe for optimal dissipation.

### Optimized Heat Distribution - Core Pipe

Square-shaped Core Pipes maximize heat dissipation with the Vapor Chamber for superior cooling.

### Wave Curved 4.0

Precision-engineered wave edges with a high-low fin design enhance airflow and reduce turbulence.

### Air Antegrade Fin 2.0

The fins feature a V-shaped cutout and a high-low design at the airflow passthrough to optimize flow efficiency.

### Metal Backplate

A reinforcing metal backplate with airflow vents and thermal pads enhances cooling.

### MSI Center

The exclusive MSI Center software lets you monitor, tweak and optimize MSI products in real-time.
