**FAQ No. 01728**

**How to display 2 external monitors by S12T at the same time?**
Affected Model: S12T

**Q:** What should I set if I want to connect 2 external monitors with D-sub and HDMI port and display them at the same time?

**A:** Please follow the steps below to setup:

Take WIN8.1 OS for example, presss "Windows key ⊞ + P" to call Project mode menu, click on "Second Screen only". Then you can make 2 external monitors light up.

**Q:** Why can't I use "Extend" display mode to make 2 external monitors work at the same time?
**A:** This laptop only supports 2 displays simultaneously (including laptop screen), so "Second screen mode only" is the only option if you want to display on 2 external monitors.
