

Identifying WLAN modules

Q: I have no idea which wireless adapter is being used in my notebook?
How do I know which wireless adapter is being used?

A: Please check the hardware ids which can found under the device manager.

- I. Go to Control panel → Hardware and Sound → Device Manager
- II. Select Network adapters (2) → Wireless Network adapters(3) → Details (4) → Select Hardware Ids(5)

III. You may confirm the wireless lan adapted by checking the device vendor ID and system ID(6) found on the table below.

Driver	Sub-Vendor ID/Sub-System ID
Wireless Lan (Chicony XW204E)	0401/1B9A
Wireless Lan (Azure AW-NE785H)	1A3B/1089
Combo Card (Chicony WB214E)	WLAN: 1B9A/0C03
Combo Card (Azurewave AW-NB037)	WLAN: 2C37/1A3B
