Why F3 Key factory
recovery function failed

SOME ARE PC, WE ARE GAMING

TRUE  GAMING

Agenda

After upgrading the system to Windows 10 1709 Fall Creators Update (the Redstone 3), F3 Key factory recovery function could failed and can't enter the system then show the error message like picture as below.

Please follow the next page instruction to solve it.

- 1. Download the WinRE tool. Download Link: [Recovery USB Tool](#)
- 2. Unzip the zip file to folder and copy all files inside an empty USB flash drive.
- 3. Reboot the system and press F11 Key to call boot menu.
To select the USB flash drive for boot up.
- 4. Wait until MSI Recovery System window shows up.
- 5. Click on System Partition Recovery button to start the system restore.
- 6. Wait until the recovery process complete; reboot the system to have the factory settings restored.
