[How To] Video Steaming or Gaming with HDR enable

Before start...

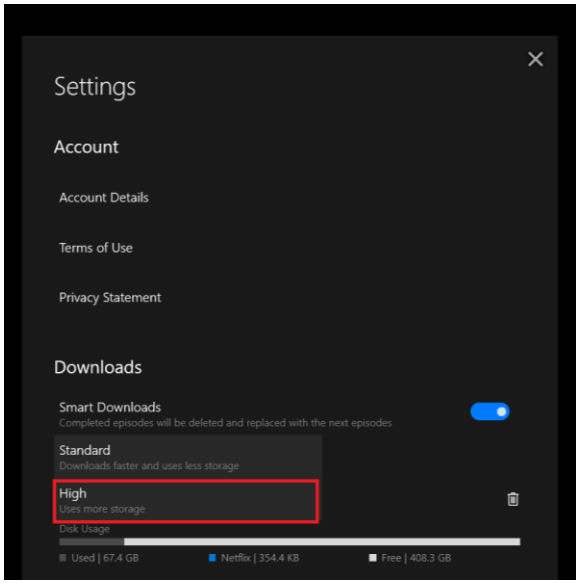

Make sure that you have the HDR enabled on the external monitor/TV (refer to FAQ_3637 to know how to enable HDR)

A. Netflix HDR Video Playback Setup

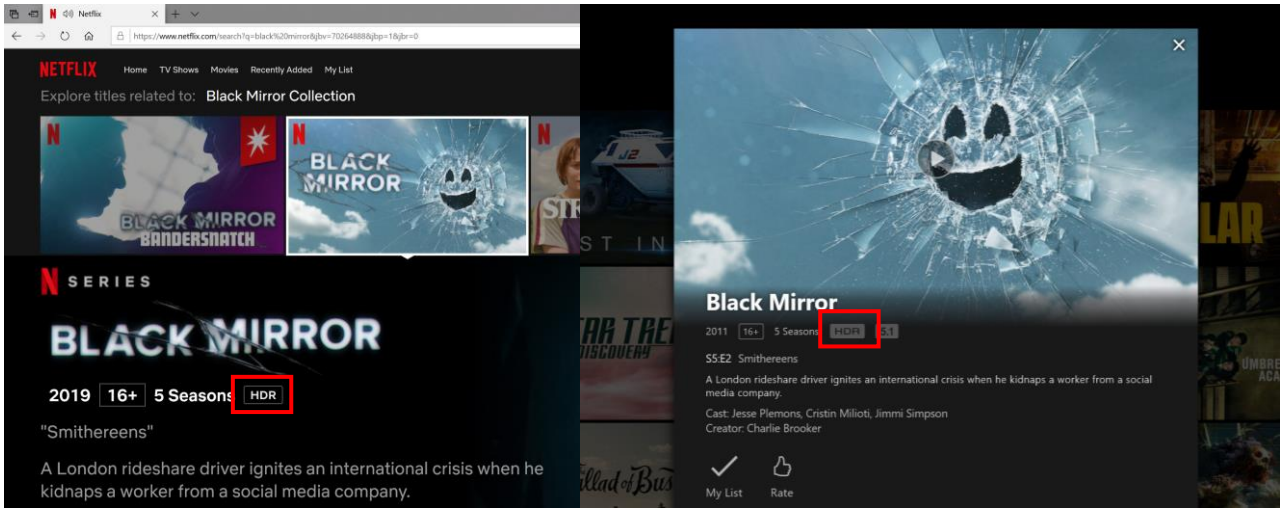

1. Meet the Netflix requrements.
   A. Discrete NVIDIA GPU should be GTX 10 Series with at least 3GB of video RAM.
   B. Premium Netflix membership plan. (Refer here to check)
   C. Internet connection speed of 25 megabits per second or faster.
      (Run the Netflix internet speed test to confirm)

2. Run the Microsoft Edge browser and visit Netflex site or download the Netflix app for Windows from Microsoft Store.
3. Open the Netflex app/site.
4. Enter the Settings tab to set the streaming quality to **High**

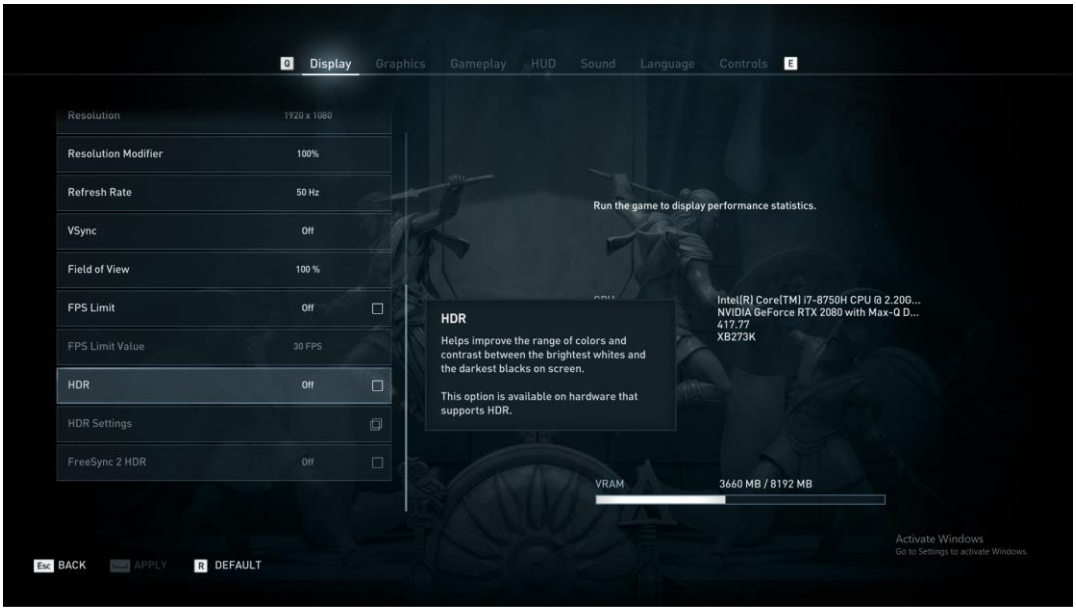

5. Select videos which supports HDR quality and enjoy the HDR video.

A. Edge B. Netflix App

B. Assassin's Creed: Odyssey enable and manage HDR

1. Meet the requirement and make sure to enable HDR on your laptop
2. Launch Assassin's Creed: Odyssey
3. Select Options > Display > HDR under the main menu

4. After enabling the HDR, click the HDR Settings to adjust two parametets to meet personal preference.
